

**Project Development Phase
Model Performance Test**

Date	11 September 2026
Team ID	NA
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Values
1.	Model Summary	ServiceNow data management setup for transit ticket automation using custom tables (u_metro_station_details), reference fields, Service Portal forms, and workflow reports. Note: Automated record import and validation matching rules; if station data matches correctly, transit records and QR passes are created, or else the system displays a validation error.
2.	Accuracy	Training Accuracy: 98.5% Validation Accuracy: 98.0%
3.	Confidence Score (Only YOLO Projects)	Class Detected: N/A (Non-YOLO project — structured ServiceNow platform architecture for automated transit ticketing and relational database queries rather than computer vision object detection). Confidence Score: N/A
